Subject: RIN 1210-AB32

To whom it may concern:

Americans do NOT need further government paternalistic interference in the way we choose to invest our money! We have already seen what the government takeover of our healthcare system has done: Reduce choice of providers and raise costs astronomically. We don't need the same thing with our investment/retirement accounts. If you think Americans are too dimwitted to manage their retirement accounts effectively, consider how a bunch of complete IDIOTS in Washington, D.C. thought subsidizing Solyndra's "green energy" was a bright idea. How and where I invest my retirement funds is NONE OF YOUR DAMNED BUSINESS!!

Capiche?

William Burt

P.S. I am not an investment/financial advisor.
